BAYVIEW COMMUNITY BASED TRANSPORTATION PLAN

SFMTA PROJECT TEAM

Christopher Kidd

Project Manager

Senior Transportation Planner

Complete Streets | Sustainable Streets Division

Ariel Ward

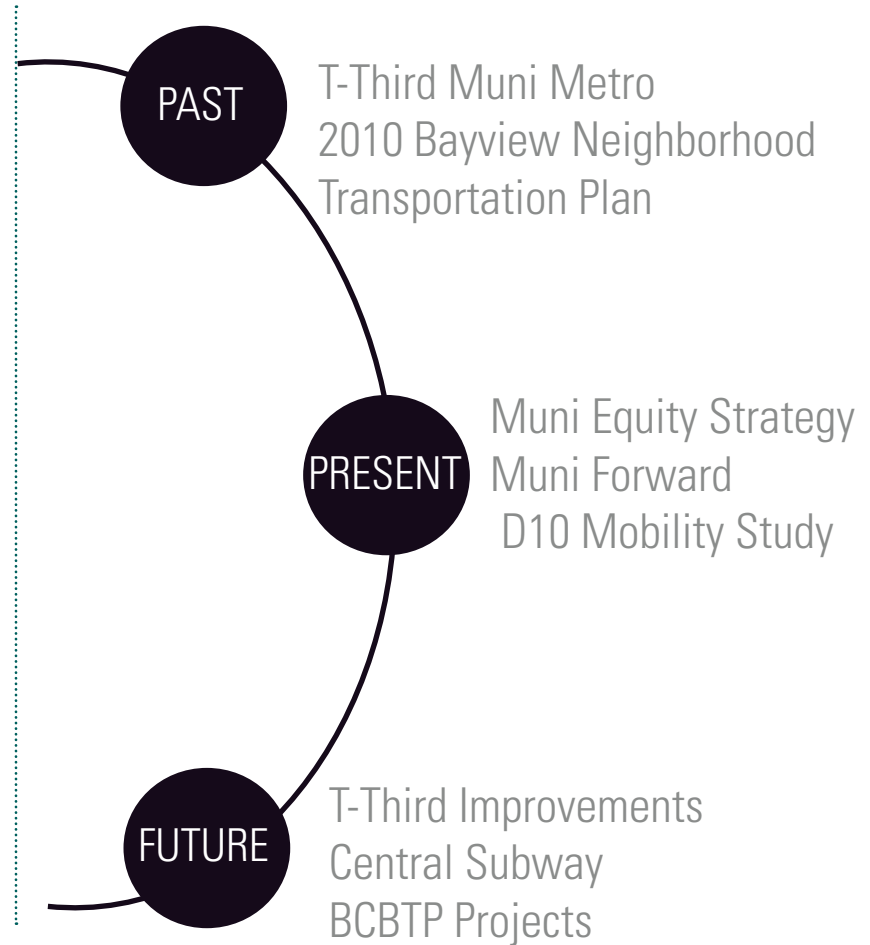

Project Planner

Transportation Planner

Complete Streets | Sustainable Streets Division

WHY COMMUNITY BASED TRANSPORTATION PLANNING?

- **Unmet transportation needs**, many of which have already been expressed by community members
- **Mixed record of project delivery** to the community
- **Partnership with residents and community groups** to identify transportation priorities
- **Prioritize** implementation and funding to ensure the **on-the-ground results for the community**

WHAT'S IN THE PLAN?

The Bayview Community Transportation Plan can include:

- **Pedestrian improvements**, such as better sidewalks or intersection improvements
- **Bike improvements**, such as bike lanes, neighborways, or bike parking
- **Bus improvements** such as better bus shelters and signal improvements
- **Streetscape improvements** such as new street trees, public art, or pedestrian plazas

The Bayview Community Transportation Plan will **not** include (but may influence):

- Changes to Muni transit service
- Emerging Mobility Services and Technologies
- Bikeshare station siting
- Traffic enforcement

PROJECT TIMELINE

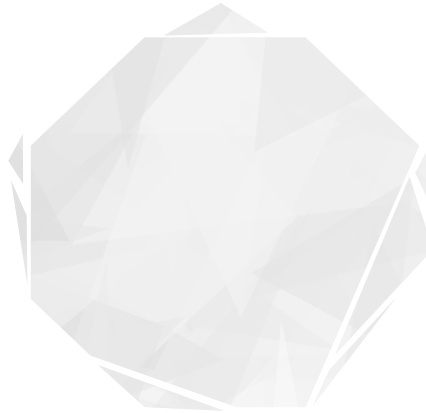

Two year, open-ended planning process

PROJECT APPROACH

RESPECT

Respect community's contributions to past planning efforts

EMPOWER

Empower and elevate community voices throughout project process

OUTREACH

Utilize outreach methods that reflect and engage whole community

WE NEED YOU!

Planning our next steps...

WHO
SHOULD WE
REACH?

HOW DO
WE REACH
THEM?

HOW CAN
WE PARTNER
WITH YOU?
